Product designer who makes complex systems simple. I turn complicated back-end processes, like real-time payments and approval workflows, into experiences people can pick up quickly. My decisions are grounded in research with real users, I write HTML and CSS so I know how my designs will be built, and I use AI to critique designs and prototype faster while the design decisions stay with me.

Experience

UX Designer & Researcher

JUNE 2022 – PRESENT · FULL-TIME

Corporate One Federal Credit Union · Remote

- **Immediate payments product:** Lead UX designer on an in-house product replacing a third-party payments platform. Ran 13 member interviews, built three personas, and led a competitive analysis of three systems, then designed the send flow and payment approvals as an interactive prototype.
- **RTP Info Center redesign:** Led the research and redesign of a payments resource hub, lowering its PURE usability score from 77 to 55 (lower is better) without development resources. Earned a Growing Professional Spotlight Award in August 2025.
- **Members Only portal:** Led UX for the portal hundreds of credit unions use daily, running ten usability tests in two rounds so the second round could validate fixes from the first.
- **Public website design system:** Audited a 50+ page website with a stakeholder workshop, then designed a style guide and ten reusable components for our CMS.
- **HTML, CSS, and analytics:** Build responsive pages in our Kentico CMS myself, and built dashboards to measure engagement across key pages after the website redesign.

UI Designer & Developer

AUG 2021 – FEB 2023 · CONTRACT

Software Logistics · Tampa, FL

- **Design system:** Created and maintained a design system with reusable components, patterns, and style guidelines for SaaS products and internal tools.
- **Front-end updates:** Shipped responsive interface updates using HTML, SASS, and Git-based version control.

Independent Project

Cue, an iOS alarm app

DESIGNED BY ME · DEVELOPED WITH CLAUDE · IN BETA

- **Designed and developed:** An iOS alarm app I designed myself and developed with Claude, for grouping alarms so they can be turned off, paused, and resumed together. All of the design is my own work. I built it by iterating directly in code with Claude, tested it with real users, and reviewed it for accessibility.

Skills & Education

SKILLS User Research · Usability Testing · Competitive Analysis · Interaction Design · Prototyping · Design Systems · Information Architecture · Accessibility Review · CMS Implementation

TOOLS Figma · Framer · Claude · Miro · UserTesting · Kentico CMS · Google Analytics · Data Studio · HTML & CSS · Git

EDUCATION

NN/g UX Certificate, Nielsen Norman Group · Interaction Design Specialization · 2024

M.A. Mass Communication, University of Florida · Digital Strategy Specialization · In progress

B.A. Digital Arts and Sciences, University of Florida · Magna Cum Laude · 2022
