- Design Systems & Style Guides
- Information Architecture
- Content Audits
- User Research & Usability Testing
- CMS Implementation
- Front-End Development

SUMMARY

Product designer with over five years of experience creating end-to-end digital experiences for web and app, including customer portals, internal tools, and public websites. I'm especially skilled at bringing structure to complex projects and creating design standards and component libraries that keep experiences consistent across teams. My background in HTML and CSS helps me work closely with developers to turn designs into production-ready solutions, and I use AI tools to work more efficiently while grounding my decisions in research with real users.

EXPERIENCE

UX Designer & Researcher

CORPORATE ONE FEDERAL CREDIT UNION | JUNE 2022 - PRESENT | FULL-TIME

- **Lead end-to-end design** for web and app experiences, from gathering requirements and research through prototyping, testing, and implementation.
- **Led a client portal redesign** for hundreds of credit unions, aligning business, product, development, and marketing teams through launch.
- **Led a website design system,** auditing existing content with stakeholders and creating a style guide and reusable component library for the CMS.
- **Lead UX for a new payments product** built in-house, defining user flows and designing complex workflows within a larger multi-application platform.
- **Design and build responsive pages** in Kentico CMS using HTML and CSS, creating production-ready pages and templates.
- **Conduct user research** including usability testing, heuristic reviews, competitive analysis, surveys, and analytics to guide design decisions.
- **Bring AI tools into the design process,** including Microsoft Copilot, Figma AI, and Miro AI, to work more efficiently and improve design quality.

UI Designer & Developer

SOFTWARE LOGISTICS | TAMPA, FL | AUGUST 2021 - FEBRUARY 2023 | CONTRACT

- **Designed user interfaces,** wireframes, and interactive prototypes for SaaS products and internal tools.
- **Built and maintained a design system** with reusable components, patterns, and style guidelines.
- **Implemented responsive interface updates** using HTML, SASS, Visual Studio, and Git-based version control.
- **Partnered with developers and stakeholders** to clarify requirements, refine solutions, and support implementation.
- **Improved visual consistency and usability** across products through ongoing interface and component updates.
